Note: Above drive and driven sprockets are used with Doorlec jack-shaft (wall mount) electric operators in various combinations depending of door type, size and speed requirements. When door shaft diameter is specified, driven sprocket will be bore and key seat according to chart below. Key seat size can be altered to suit your requirements at "no extra charge", must be specified. If shaft diameter is not given with the order, Doorlec Corporation will provide 1" standard bore and 1¼" x 1/8" key seat.
